To Whom It May Concern :

This is the highest of recommendation for HCR, Harris Construction. In Oct 2007 we lost our home in the wildfires in Westwood. In Nov my mother got very ill and the following Feb. my husband passed away. My mother got better but this left two women trying to find a construction company we could trust after hearing so many horror stories. In Nov. 2008 our architect gave us a list of companies and their bids. Fred and Jessie called and wanted to meet us. The moment they walked into the condo and we started talking, we knew they were the builders for us and we never looked at anyone else. Their bid was very reasonable and many people thought it was too low and there were no hidden additional expenses.

In Jan. 2009 they started construction and 5 1/2 months later, on June 15, we moved into our beautiful three bedroom home. No one could believe it took such a short time from bare ground to a beautiful new home completely furnished and us moved in. Being I had to make all the decisions by myself Fred and Jessie took time out of their busy work days to help me pick out cupboards-tile-carpeting and even the paint. They never once complained and made sure no one took advantage of me or my mom.

Their crew is unbelievable! No matter when I stopped by the job they were all working. They took time to explain what they were doing and what was next. They were all very professional but also very friendly and hard working.

Fred and Jessie became more like friends than a company we employed. In July, we had our open house and neighbors and friends could not get over our new home and how well it was built. If they had questions Fred + Jessie were very happy to answer their questions.

Anywhere I go and people ask, I tell them about Fred and Jessie - Harris Construction. I also have told them anytime that anyone wants to talk to us - I would be happy to ~~talk~~ talk to them whether it be about a new home - addition or remodel.

If I ever need anything else done to my house, they will be the only people we call. Fred and Jessie are proof that there are people in the world who do take pride in their work and do care about people.

Sincerely

Sharon Susalla-Lapinsky
